MANAGEMENT DISCUSSION & ANALYSIS REPORT (2013-14)

The Board of Directors takes pleasure in presenting before you, the Company's 3rd Annual Report for the Financial Year ending March 31st, 2014, along with Corporate Governance Report.

Management Discussion and Analysis Report on the Business of the Company as applicable and to the extent relevant is given below:

BUSINESS ENVIRONMENT:

Global

The world economy has experienced subdued growth for another year in 2013, unable to meet even the modest projections many institutional forecasters made earlier, including the World Economic Situation and Prospects (WESP) 2013. According to the information available in November, world gross product (WGP) is estimated to have grown by 2.1 per cent in 2013, lower than the baseline forecast of 2.4 per cent published in WESP 2013, but still better than the alternative pessimistic scenario presented in that report.

Some signs of improvements have shown up more recently: the euro area has finally come out of a protracted recession, with gross domestic product (GDP) for the region as a whole returning to growth; a few large emerging economies, including China, seem to have backstopped a further slowdown and are poised to strengthen. WGP is forecast to grow at a pace of 3.0 and 3.5 per cent for 2014 and 2015, respectively. Again, this baseline forecast is made in the context of a number of uncertainties and risks emanating from possible policy missteps and factors beyond the economic domain.

In the out-look, assuming that the future unwinding of the monetary easing will be smooth, GDP is expected to increase 2.5 and 3.4 percent for 2014 and 2015, respectively. Risks remain on the downside, however, particularly because political wrangling over the budget may linger for several years.

Growth in South Asia remains lackluster as a combination of internal and external factors hamper activity, particularly in the region's largest economies, such as India, the Islamic Republic of Iran and Pakistan. Growth is estimated to be 3.9 per cent in 2013, nearly the slowest pace in two decades. Growth is forecast to pick up moderately to 4.6 per cent in 2014 and 5.3 per cent in 2015, supported by a gradual recovery in domestic demand in India, an end to the recession in the Islamic Republic of Iran and an upturn in external demand.

Domestic

The Indian economy recovered in the second quarter (Q2) of 2013-14 recording a growth of 4.8 per cent. This follows a growth rate of 4.4 per cent in the first quarter (Q1) of the current financial year— the lowest in 16 quarters. Particularly encouraging is the fact that the recovery in Q2 is noticed on the face of significant fiscal consolidation by the Government and tighter liquidity conditions to moderate aggregate demand.

The economy went through challenging times since the crisis in the Euro area in 2011-12 with a cyclical down turn with growth slowdown, elevated current account deficit, persistent inflation, and the need to restore fiscal policy to a sustainable path. While the Government delivered on the announced fiscal targets in 2012-13, current account deficit (CAD) continued to remain

elevated in Q1 of 2013-14 and in tandem with market misperception of an imminence of the rollback of quantitative easing in US, assumed a serious dimension with the sharp depreciation of the rupee.

The Government put in place a series of measures and there has been a significant let-up in the challenges on the trade and balance of payments front, particularly in the Q2 2013-14. Domestic impediments like elevated levels of food and retail inflation, high input costs and pressure on profit margins and infrastructural bottlenecks continued, with the Government addressing them through appropriate calibration of fiscal policy, administrative measures and institutional mechanisms like Cabinet Committee on Investment to fast track projects.
